## Life and Death Decisions

Lessons From a Pandemic CPO

#### Randeep Sidhu

Former Director, NHS C19 app @mr\_randers

# A product you build **will kill** someone.

# A <u>decision</u> you make **will kill** someone.

What will you do to **make sure** your <u>conscience is clear?</u>

## You regret joining this talk?

# HAVE AN ANNOUCEMENT

## Pandemic: unpredictable

## Extreme stress: daily

## No different from a startup!

## 3 lessons during stress

## Universal = Behaviour

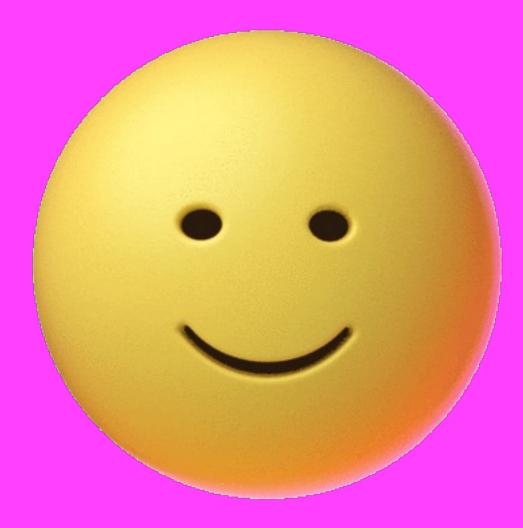

## Trying to be honest

## **Under stress:**

- 1. My behaviour
- 2. <u>User behaviour (& product)</u>
- 3. Why impact is hard

#### Recently Chief Product Officer at:

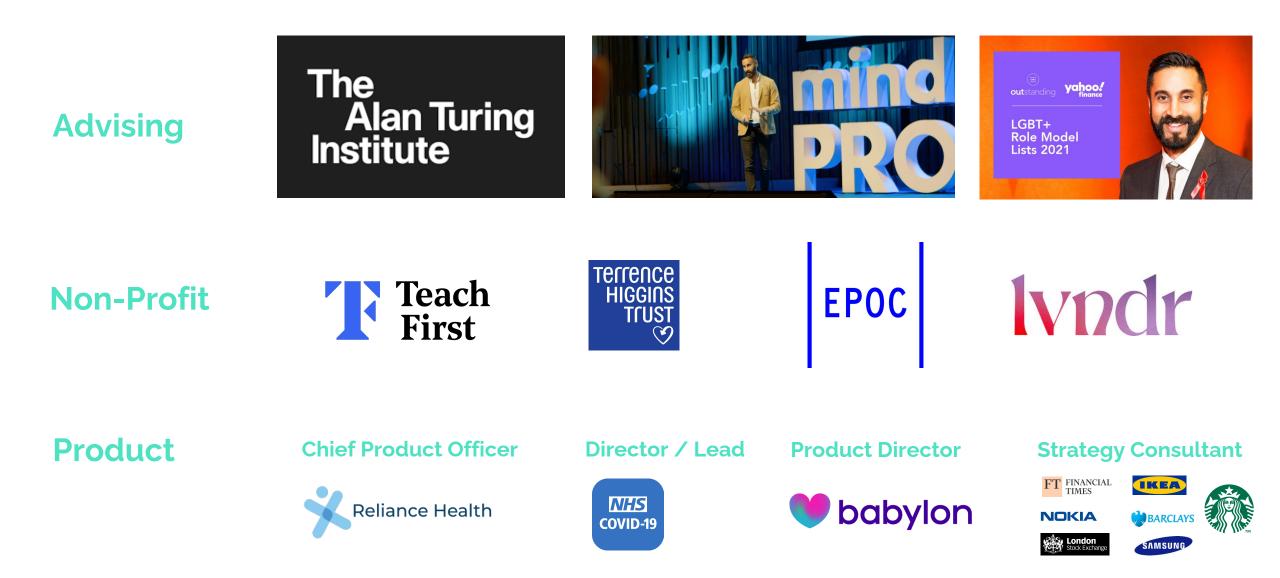

## RelianceHealth

Using Technology to Make Healthcare Accessible and Affordable in Emerging Markets

200k patients in Nigeria and Egypt so far

#### What else I do:

#### June 2020 I'm working

#### **Product Director**

- AI health tech
- Largest GP
- US, Canada, UK, Rwanda
- Doing Covid help!

#### March - June 2020 UK Gov building Covid App

#### Know if you have been exposed to COVID-19

The app has detected that you have been near someone who tested positive for COVID-19

Close-contact happened on

June 2020 NHS App fails

# Why the NHS Covid-19 contact tracing app failed

Test, track and trace - just not with the NHS app

000

June 2020 I get <u>series</u> of urgent calls

## URGENT:

## 2 days later

- Leave my job
- Join Gov.
- All < 1 week

#### "This will be career suicide"

"What do you think you can change... it's failed once already!"

# Why did I say yes?

## 1. So my conscience is clear

2. I can do something others can't?!

## I think I'm a Saviour?!

#### \*Magical Punjabi Jesus

## Reality 1 So I think I'm a superhero?

Example: Building languages

## It's a s\*\*t show Let me do my job!

## **Official Languages** English Welsh

#### **Built for all** App/Assets in 12 Languages 98% first languages in UK

Q – How to pick your language?

#### Change language at system level

#### Change language only in NHS app

15፡02 🤂 🖪 🏯

🚸 💐 🧙 🛯 48% 🛔

Q

General management

Language English (United Kingdom)

Text-to-speech output

Date and time

Gboard settings Multilingual typing

## Agency push back

Not my lived experience

#### **Did research**

• Language switch not needed in app

#### Felt Odd

- "Did anyone have English as 2<sup>nd</sup> language?"
- OOPS

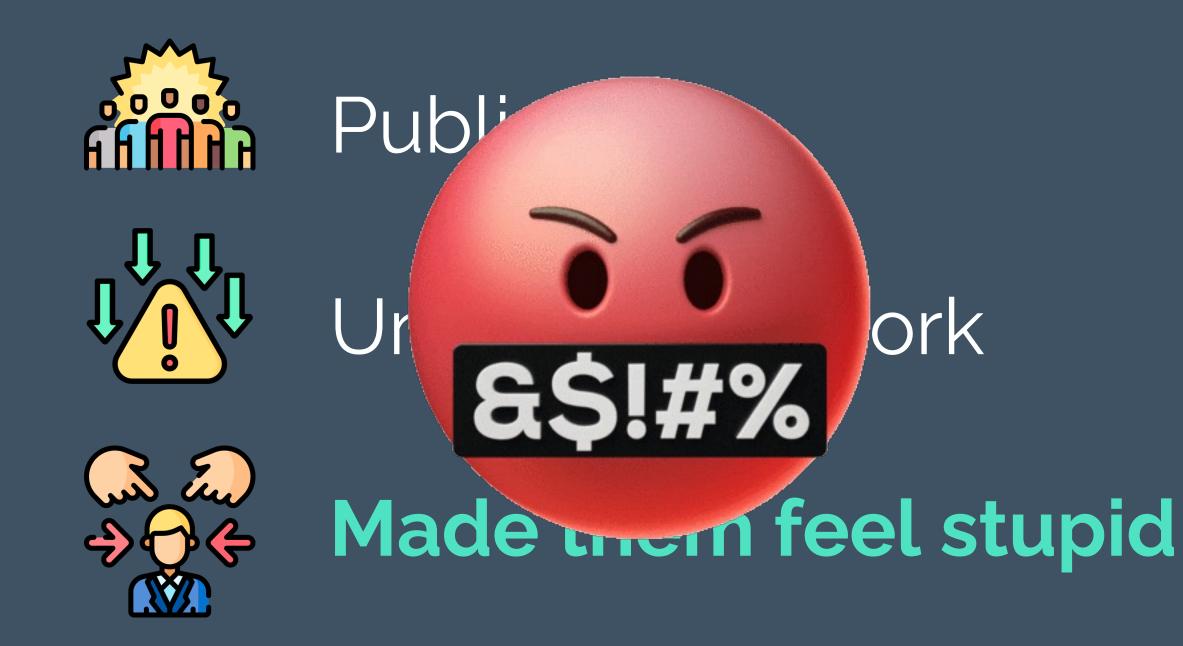

You see - I'm right I'm not the hero Gotham <u>deserves</u>

### I'm the hero Gotham <u>needs</u>

## Umm... Really?

#### Reality 1

## You are not <u>acting</u> the hero

When moving at speed - You are likely to <u>act</u> the villain

#### Learning 1 If you are likely to <u>act</u> the villain:

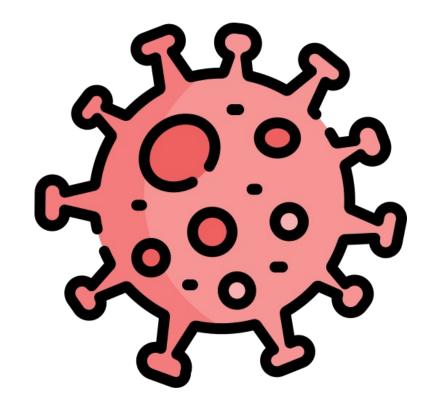

## Reality 2 Users: Chaos versus control

Example: **QR check in feature** 

#### Chaos

**Users:**  Scared Angry with the app

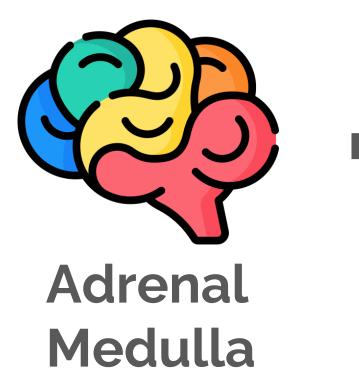

#### But the app WAS a success?

# nature

The epidemiological impact of the NHS COVID-19 app

- App averted <u>1 million</u> infections
- App <u>saved 10,000</u>
   <u>lives</u>

#### Success because **focus on USERS behaviour**

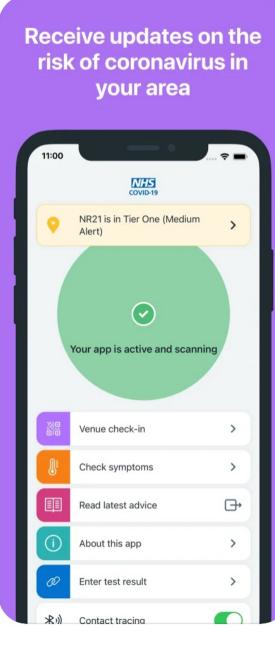

#### Anxiety & Paranoia

#### Looking for danger (hypervigilance)

## Focus on lowering adrenaline

BATMAN THE MOVIE 62017 FOX

#### Check in now

Before entering, everyone must scan with the NHS COVID-19 app or provide their name and contact details

The NHS COVID-19 app is proven to help stop the spread of COVID-19.

Protect your loved ones. Use the app.

NHS

**Test and Trace** 

# Why did people use it?

## Not by using more force or pressure

## No threats No fear or panic

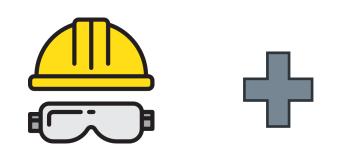

#### Control

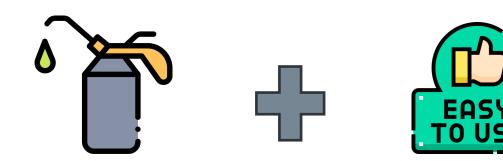

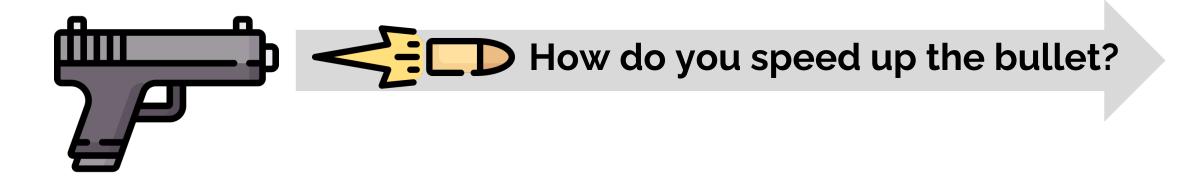

### Immediate insurance

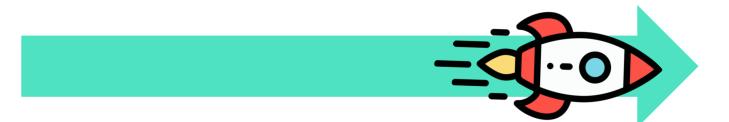

#### Threats = More gunpowder

Less Friction = More aerodynamic

#### **Learning 2:** During stress your <u>users need</u>:

1. Increased control

2. Reduced friction

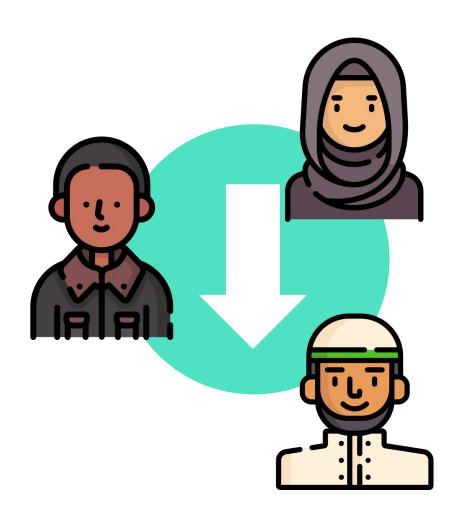

Reality 3 Why impact is hard to make

# (aka What is a villain really?)

Example: **User research** 

#### Issue: User numbers not high enough

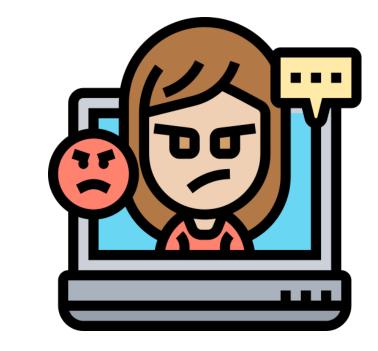

If **these people** don't want to work with us, what can we do?

It's not our fault, these people are not listening

#### RESEARCH. Who do users **trust to help them**?

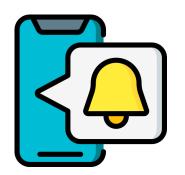

The Covid App

Covid Division

The NHS

**UK Government** 

Boris Johnson

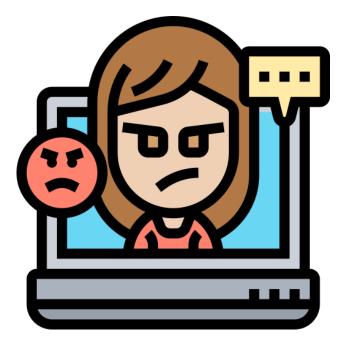

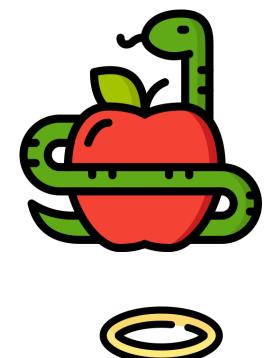

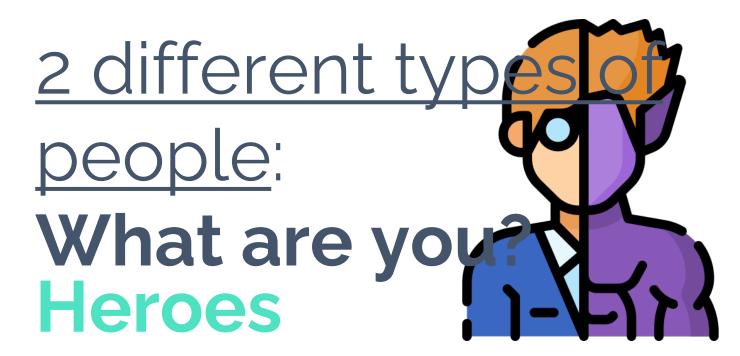

#### I challenged the STATUS QUO

- **1.** Needs to be liked
- 2. Defend the status quo
  - keep things as they are
- 3. Reactive
- 4. Comfortable- Don't look to improve

#### Villains

- 1. Don't need to be liked
- 2. Challenge the status quo
  - know today is not perfect
- 3. Proactive
- 4. Striving
  - want to improve things

Very close

### Want different things

#### Villains challenge the status quo

## The issue is their methods

\*Killmonger having a birthday party

Challenging status quo creates discomfort **Even if doing it** right!

People will vilify you for it

#### Learning 3: Change is hard because

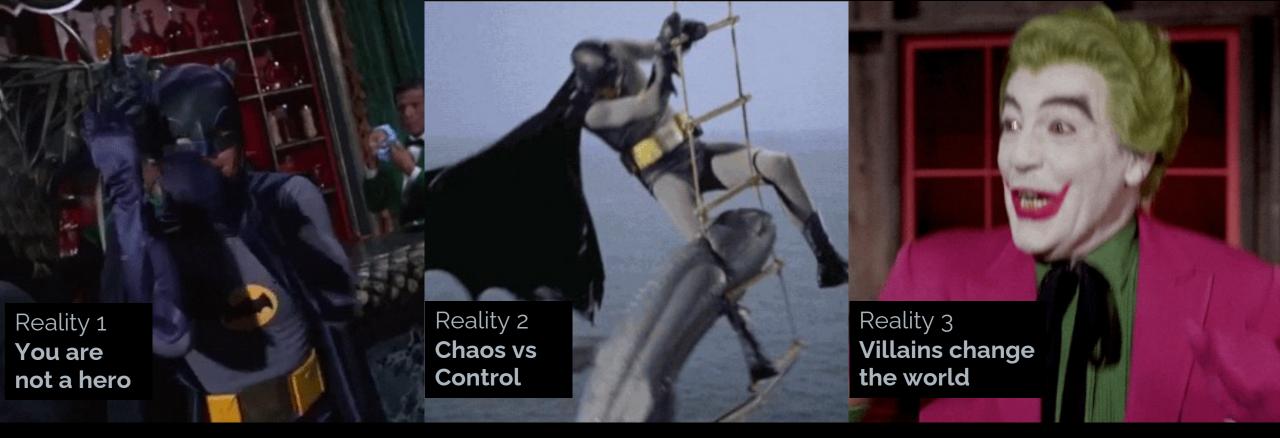

Challenging status quo can make you <u>SEEM</u> a villain

You need to get comfortable in the discomfort, and know you are right

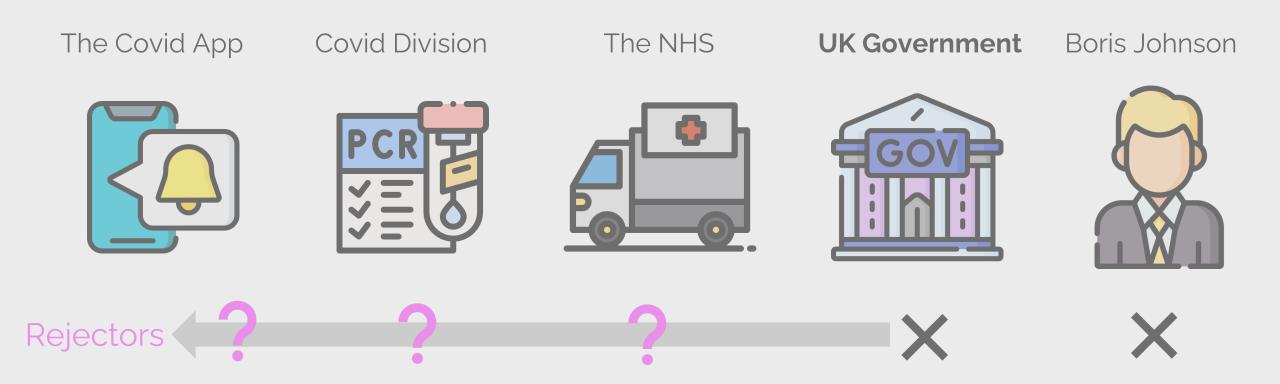

Don't <u>ACT</u> a villain - Always punch UP not down, and keep empathy

 You should check your ego & power, as you are more villain than hero 2. Your users needcontrol and lessfriction.Not more pressure

3. Changing status quo
makes you seem a villain.
Be ok with not being liked.
Always punch up!

#### Before I go Remember separating Gov and App?

## Reach out for Q's, advice or *mutual therapy*

#### **Randeep Sidhu**
